BASIC BEEF SPECIFICATION CATEGORIES

GRASS FED BEEF Lean and generally favoured as it is seen as healthy and low in fat.

GRAIN FED BEEF Characterised by white fat and fat deposits through muscle tissue. This marbling can contribute towards improved tenderness and taste.

VEAL Animals can come from both the beef and dairy industries. Lightweight veal carcasses less than 70kg are typically milk fed dairy calves. Carcasses up to 150kg are typically milk and grass fed vealers or weaner. These heavier carcasses display a light pink muscle colour.

BEEF AND VEAL LANGUAGE

Veal - V

0 PERMANENT INSCISORS

Female or entire male with no S.S.C. 0 - 70 kg H.S.C.W.
70.1 - 150kg when carcass shows youthfulness and pinkish flesh.

Beef - A

0 - 8 PERMANENT INSCISORS

Greater than 70kg H.S.C.W.
Female or Castrate male or Entire male with no S.S.C. of any age.

Bull - B

0 - 8 PERMANENT INSCISORS

Entire male or Castrate male bovine showing S.S.C.

(S.S.C. = SECONDARY SEXUAL CHARACTERISTICS)
(H.S.C.W. = HOT STANDARD CARACASE WEIGHT)
