

WASHED OR BRUSHED IN BAGS OR BINS

**Southnet Trade Australia** is located in the Riverina region of NSW – the heart of Australia’s largest vegetable growing region. Two potato crops are grown each year, providing freshly harvested potatoes for eight months of the year. South Australian potatoes provide the balance of our year round supply.

Potato farms up to 7,000 acres irrigated from the Murrumbidgee River produce potatoes of high quality. Potatoes are brushed or washed, graded to specification into bags or bins and packed on farm to reduce handling.

Varieties grown include nadine, sebago, coliban, desiree, pontiac and atlantic.

The Spring crop is sown July and August and harvested November to January. The Autumn crop is sown February and March and harvested June to October. Yield per hectare for Spring crop is around 30 tonnes and for Autumn crop around 20 tonnes per hectare.
