

**Southnet Trade Australia** is the exporter of Australian grown sesame seed and cold pressed virgin sesame oil. Sesame production is an emerging new industry for Australia. Farmers are increasing production.

## Natural Sesame Seed

Cleaned and packed sesame seed is available in 25kg bags.

This product is not dehulled and is suitable for onprocessing for sesame oil manufacture. It is also available certified organic by under contract.

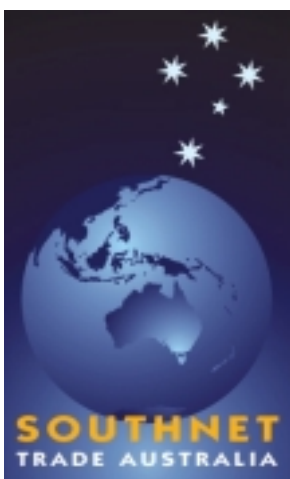

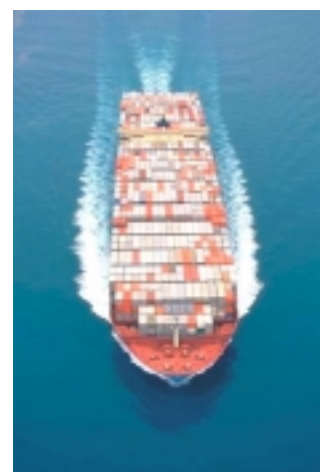

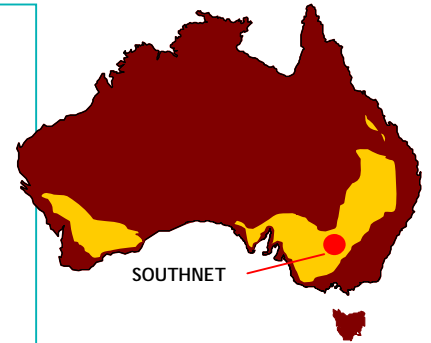

## Extra Virgin Cold Pressed Sesame Oil

Cleaned sesame seed is mechanically pressed to release this delicious, attractive and nutritious golden oil.

Sesame oil is one of the finest and most beneficial of oils. It has a high concentration of vitamin A and vitamin E and contains natural antioxidants sesamin, sesamol, sesamol and pycnogenol which stabilises and protects against rancidity. 87% of the fats in sesame oil are unsaturated and 41% are linoleic.

Sesame contains two important amino acids. Methionine is crucial for the maintenance of a healthy liver and can produce Choline which helps the body to handle cholesterol and produce energy rather than fat. The other amino acid, Tryptophan is the precursor of niacin which is essential for a healthy nervous system. It is also reported to promote youthful skin and healthy hair.

Extra Virgin Cold Pressed Sesame oil is an extremely versatile product that has good shelf life and is quite durable. It can be used for cooking, dressings, sauces and marinades as well as for massage and as an ingredient in cosmetics.
