# TEXTURED VEGETABLE PROTEIN PRODUCTS

**Southnet Trade Australia** is exporter of Australia's only domestically manufactured textured vegetable product range.

TVP has the appearance, textures and mouth feel of real meat. In a blend TVP takes on the colours and flavours of accompanying meats and sauces.

Made by extruding and lightly toasting defatted soya flour TVP is used in the food industry as a meat substitute and extender. By adjusting the moisture, temperature and pressure on the soya flour during extrusion softness, elasticity, brittleness and crumbling characteristics can be adjusted to requirements. Interchangeable extruder dies offer a wide range of shape and size options.

Taste and colour can be made to order as mince, dice, flake, chunk, crumble or flour.

Rich in protein (48-50%), complex carbohydrates, dietary fibre, iron, calcium, Vitamin B, potassium, zinc, phosphorus, thiamine, riboflavin and niacin TVP is also low in fat and cholesterol free.

TVP absorbs three times its weight in liquid making it an excellent bulking agent and maintains shape and structure during freezing and defrosting.

Uses include:

*Hamburgers*

*Tacos*

*Fish Based Meals*

*Soup Mixes*

*Baked Goods*
